

How fun that you bought a PILL mirror from TÔNÑ!
We hope that you'll get along well at home.

MOUNT YOUR MIRROR

THE PACKAGE CONTAINS:

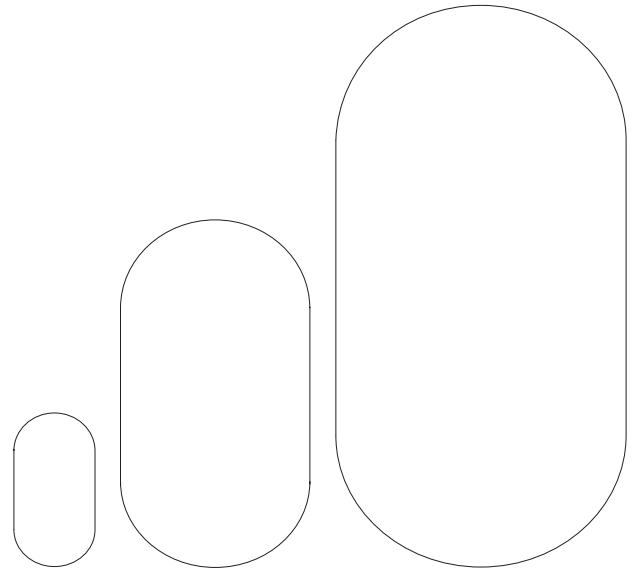

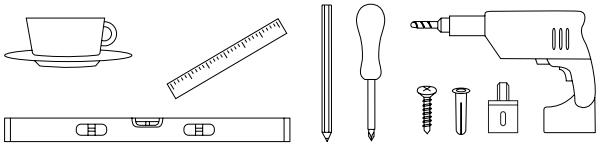

Mirror
Fittings x2 / x4

Screws
Anchors/pins

YOU'LL NEED:

Coffee and some cake
Folding rule
Screwdriver

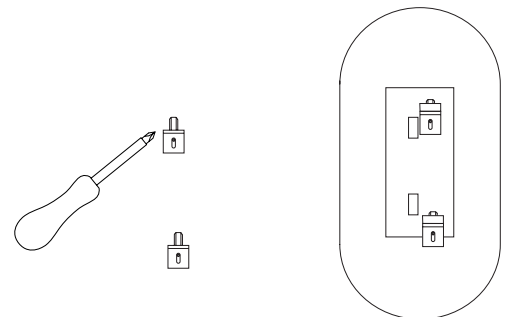

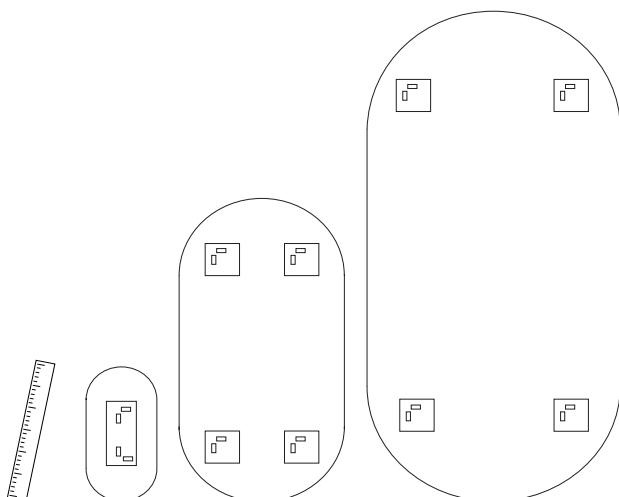

Drilling machine
Spirit-level
Pen

PLEASE NOTE The screws and pins included are adapted for good quality walls. If you are unsure about the material of your wall, please contact your nearest construction store for consultation.

MOUNT

1. Unpack the mirror from the box. Please note that the fittings are placed in the edging of the packaging
2. Choose if you want the mirror to hang horizontally or vertically.
3. You'll find fittings on the back of the mirror that matches the fittings to be mounted to the wall. For PILL small and medium you should use two of the fittings (for PILL medium the top two). For PILL large we recommend using all four fittings.
4. Measure the dimension between the fittings and mark it on the wall.
5. Drill, put up the pins and attach the fittings with screws. The flat wide side of the fitting should be towards the wall at the bottom, the pointed at the top so it gets a little distanced to the wall. See PILL small below.

6. Hang your mirror on the fittings.
7. Take a look in the mirror, looking good!
8. Pat yourself on the shoulder, you're done. Enjoy a cup of coffee and some cake.
